

Dear Parent/Guardian,

After every **AKA Science** class, your child may take home some of the supplies they used. This provides an opportunity for them to share what they learned and continue their experimenting at home!

**Supply Advisory:**

- Students should never put supplies in their mouths, in their eyes, or down a drain, etc.
- Some supplies could be a choking hazard for children ages 3 and under. If you have very young children at home, please make sure AKA Science supplies are kept in a safe place.
- Some supplies may contain latex.

**If you have concerns about take-home supplies, please contact your after school coordinator.** Thanks!

---
