

# ATTACHMENT TECHNIQUES

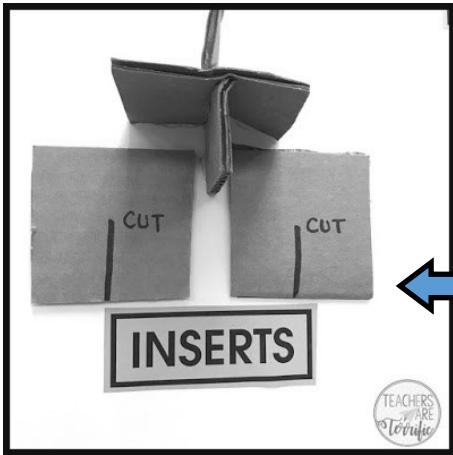

There are many ways to attach two pieces of paper or cardboard together. Each method has a different use. Check out these examples and then try to make your own versions!

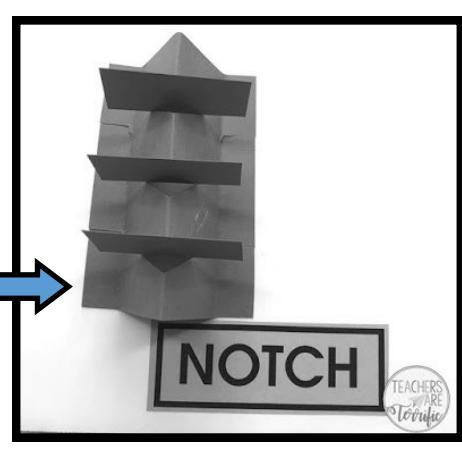

**Gussets** help strengthen the corners and joints of bigger objects.

**Fasteners** connect two pieces that can rotate or spin.

**Inserts and Notches** help create strong 3-D shapes with parts that fit tightly together.

**Flanges and Tabs** make it easier to tape or glue shapes together.
